-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims Rejected

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, and 9-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Murata et al. '989. Murata shows a diesel engine particulate trap regeneration method and apparatus wherein a temperature sensor 43 determines a condition of the trap 25, and wherein a map of engine torque and speed for causing the soot in the trap to burn is shown in figure 12. The engine and transmission are controlled to obtain the proper trap temperature if the temperature is outside a required range. See column 6, 13, 14 and 15.

Subject Matter Allowed

Claims 5-8 are objected to because they contain allowable subject matter yet depend from a rejected independent claim. The subject matter is allowable because the prior art does not anticipate nor render obvious the invention as recited in claim 1 with the additional features of modifying the engine operating point outside the predetermined running region, or controlling a fuel injector to either perform a post-injection, or delay the injection timing, or determine that the filter needs regeneration if the pressure differential between an inlet and an outlet exceeds a predetermined value.

Conclusion

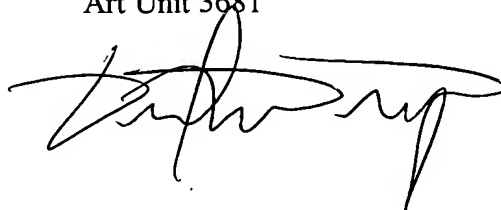

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
